NPPC-VUPOP: national soil and agricultural land data/information authority

- more than 50 years of research and decision-support for sustainable management and protection of soil and land resources
- hosting institution for National Agricultural Soil Information System
- administrator of Land Parcel Identification System for Slovakia
- *Soil Management Strategy in Danube Region (SONDAR), Interreg programme, Central Europe, bilateral cross-boundary project, (2007 – 2013)*
- *Urban Soil Management Strategy (URBAN SMS), Interreg, Central Europe programme, (2008-2012)*
- *Assessment and strategic development of INSPIRE compliant Geodata-Services for European Soil Data (GS SOIL), eContent+ programme (2009-2012)*

RECROS Project development workshop

Possible contributions to the RECROS project proposal

- data collecting and knowledge support for pilot areas in Slovakia (soil, land cover and land use, biomass production, etc.)
- support specific needs of models employed within the SDSS (Spatial Decision Support System) at national or regional levels with spatial and other data analyses
- communication with local stakeholders (needs and implementation of the project outcomes)
